

WOMEN IN COMPRESSED AIR / VACUUM / COOLING

Women in Compressed Air, Vacuum & Cooling Networking Group Launched

Best Practices Magazines & EXPO announced the January 2023 launch of the Women in Compressed Air, Vacuum & Cooling networking group (WVCV). The group provides support to women who have chosen or are thinking of choosing a career in the compressed air, vacuum or cooling industries and welcomes individuals from every job function – engineering, marketing, sales, human resources, finance, production and every job in between.

Women in Compressed Air, Vacuum & Cooling offers quarterly virtual meetings and networking opportunities in the hopes of empowering women in the compressed air, vacuum & cooling sectors. The group will meet in-person annually at the [Best Practices EXPO & Conference](#).

Ashley Gates, Marketing and Communications Manager, Quincy Compressor, was selected as WVCV Chair. She has over 17 years' experience working in the compressed air industry. Ashley said, "I am extremely excited to be part of this new organization and look forward to establishing meaningful connections with my peers and growing the network of Women in Compressed Air, Vacuum and Cooling."

Ashley Gates, Marketing and Communications Manager, Quincy Compressor, was selected as Chair, Women in Compressed Air, Vacuum & Cooling networking group.

Join us in our mission to provide women with personal and professional development opportunities including the ability to establish meaningful connections with their peers, gain valuable industry insight to further their careers and improve their leadership and communication skills. Apply for your free membership today at <https://cabpexpo.com/womens-group/join-us/>. Join our LinkedIn group at <https://www.linkedin.com/groups/14183074/>. If you are interested in a leadership role within the group and would like to become a member of the WVCV Executive Council, please send an email to Kimberly Vickman, WVCV Secretary at kimberly@airbestpractices.com.

About Best Practices 2023 EXPO & Conference

The Best Practices 2023 EXPO & Conference is the leading North American event focused on Sustainable, Safe & Reliable On-Site Utilities Powering Automation. Co-Located with Process Expo, the event takes place October 23-25, 2023 at McCormick Place in Chicago. Attendees come from engineering firms, manufacturing plants and equipment companies responsible for specifying, purchasing, operating, selling and maintaining on-site utility equipment in industrial compressed air, vacuum and cooling water systems.
